

BUG REPORTS

Title: [Homepage] [Hamburger Menu] [PROBLEM_USER] → “About” CTA does not redirect to the right page.

Priority: medium

Description: when the “About” CTA (inside the hamburger menu) is clicked, the user is redirected to a 404 error page.

Steps to reproduce:

1. Being logged in as “problem_user”
2. Being on the Homepage
3. Open the hamburger menu
4. Click on “About” CTA.

Actual result: user is redirected to a 404 error page.

Expected result: user should be redirected to the “About” page.

Title: [Homepage] [Hamburger menu] [PROBLEM_USER] → “Reset App State” CTA does not reset the app state.

Priority: high

Description: when clicked, the “Reset App State” CTA does not work and the app state isn’t reseted.

Steps to reproduce:

1. Being logged as “problem_user”;
2. Open the hamburger menu;
3. Click on “Reset App State” CTA.

Actual result: the app state remains unchanged.

Expected result: the app state must be reseted and all changes made (items counter, “Add to cart” CTA) must return to their original values.

Title: [Homepage] [Sorting Selector] [PROBLEM_USER] → The Sorting Selector does not sort the items.

Priority: high

Description: when clicked, the options of sorting presented in the Sorting Selector (dropdown menu) don't sort the items on the page.

Steps to reproduce:

1. Being logged as “problem_user”
2. Being on the home page;
3. Click on the Sorting Selector dropdown
4. Click on a sorting method

Actual result: no sorting method is applied.

Expected result: the item cards on the homepage must be displayed in accordance with the chosen sorting method.

Title: [Homepage] [Item Cards] [PROBLEM_USER] → All item cards are displaying the wrong picture.

Priority: highest

Description: all item cards are displaying the same picture, that does not correspond to an item of the store.

Steps to reproduce:

1. Being logged as “problem_user”
2. Being at the Homepage
3. View the item cards

Actual result: every card displays the same picture (that is not an article of the store) regardless of its title and description.

Expected result: each app card should display an image corresponding to the title of the product it contains.

Title: [Homepage] [Item Card] [Add to Cart CTA] [PROBLEM USER] → Some items are not added to the cart when clicking “Add to cart” CTA.

Priority: highest

Description: the following items are not added to the cart when selected:

- “Sauce Labs Bolt T-Shirt”
- “Sauce Labs Fleece Jacket”
- “Test.allTheThings() T-Shirt (Red)”

Steps to reproduce:

1. Being logged as “problem_user”
2. Being at the Homepage
3. Click the “Add to cart” CTA in the following item cards:

- “Sauce Labs Bolt T-Shirt”
- “Sauce Labs Fleece Jacket”
- “Test.allTheThings() T-Shirt (Red)”

Actual result: the CTA remains unchanged and the items are not added to the cart.

Expected result: the CTA must change its value and its text must be changed to “Remove”, the selected items must be added to the cart.

Title: [Homepage] [Item Card] [“Remove” CTA] [PROBLEM_USER] → Impossible to remove added items from the cart.

Priority: highest

Description: it's not possible to remove items added to the cart. The CTA is not clickable.

Steps to reproduce:

1. Being logged as "problem_user"
2. Being on the Homepage
3. Have added items to the cart (through "Add to cart" CTA)
4. Click on the "Remove" CTA to remove the item from the cart

Actual result: the "Remove" CTA is not clickable and the items are not removed from the cart.

Expected result: the "Remove" CTA must change its state to "Add to cart" and the items selected must be removed from the cart.

Title: [Item details page] [Overview] [PROBLEM_USER] → Item details page does not correspond to the chosen item.

Priority: highest

Description: when clicking on the name of an item inside an item card, the user is redirected to an item details page that does not correspond to the selected item.

Steps to reproduce:

1. Being logged as "problem_user"
2. Being at the homepage
3. Click on the title of an item (inside its item card)

Actual result: the item details page displayed does not correspond to the chosen product.

Expected result: user should be redirected to an item details page that corresponds to the item in the item card.

Title: [Item details page] [“Add to cart” CTA] [PROBLEM_USER] → the Add to cart CTA is not clickable

Priority: high

Description: the “Add to cart” CTA is not clickable and the item cannot be added to the cart

Steps to reproduce:

1. Being logged as “problem_user”
2. being on the item details page
3. click on the “Add to cart” CTA

Actual result: the button is not clickable and it’s not possible to add the item to the cart.

Expected result: the button must be available to be clicked and the item should be added to the cart.

Title: [CHECKOUT - PERSONAL INFO] [FORM] [PROBLEM_USER] → “Last name” field is not fillable.

Priority: Highest: blocking issue (high severity)

Description: the “Last Name” field on the checkout’s form is not fillable.

Steps to reproduce:

1. Being logged as “problem_user”
2. Being on the checkout page (personal info step)
3. Try to fill the “Last name” field

Actual result: the field doesn’t get filled. Instead, each letter typed by the user is written on the “First name” field. Due to the fact the form can never be completely filled, it also can’t be submitted and the user can’t proceed to the next step of the checkout.

Highest priority bug.

High severity.

Expected result: The user must be able to fill in all the form fields, and each field should display only the input entered into it.

Title: [HOMEPAGE] [ITEM CARD] [CART'S PAGE] [PROBLEM_USER]
[STANDARD_USER] → Cookies from different users are getting mixed together.

Users: problem_user, standard_user

Priority: highest

Description: After adding some items to the cart as a 'problem_user' or 'standard_user' and logging out of the application, when logging back in with a different user account ('standard_user' if it was 'problem_user' and vice versa), the items added by the previous user appear in the cart of the current session's user.

It's also visible from the Homepage (inside the item cards) that the CTA "Remove" is still displayed in the respective item cards.

Steps to reproduce:

1. Login as "problem_user" or "standard_user"
2. Add items to the cart
3. Logout of the application
4. Login with a different user

Actual result: the items added from one user appear in the cart of the other user, and are also marked as selected (the "Remove" CTA is displayed) inside their item cards on the Homepage.

Expected result: no record of actions from a given user should be visible or available to another user. "problem_user" is not supposed to see actions taken by "standard_user", and vice versa.
